Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-76 are rejected under 35 U.S.C. 102(b) as being anticipated by Nolting (4,832,431). Nolting discloses the claimed invention. Note figure 1 which shows a substance (10) comprising a plurality of electrodes (E1, E2, ...) having a plurality of voltage levels (U1, U2,...), and a plurality of storage elements (inherent as evident by Nolting's claim 15 which states "an electrical voltage (Ui) associated with the appertaining location for modifying the polarization and phase (Fi) is applied to these separate electrodes... where Uo is a variable maximum voltage which Ui can assume.").
